COURSE CODE: DCAP408

COURSE TITLE: Web Programming

F

Date: 21-Oct-2013   **Time: 09:30-11:30**

Time Allowed: 2 hours   **Max. Marks: 80**

Distribution of Marks: Written-20, Viva-20, Execution-40

Set of Problems/Experiments:

1. Create a web page with internal, external and intrinsic stylesheet methods.

2. Create a web page template with the help of HTML table tag. This template should contain Header section, footer section and navigation section.

3. Create a web page which can store and read username and password of a login form from the Cookies created by the web page.

4. Create javascript function such that it should validate all the web form fields. Assume that your web page contains fields related to email like To, from, subject and message.

5. Create a web page which reads and write data in any database table using ASP ADO object.
